

Fauzan Haziz

Software Developer Intern

fauzan17haziz@gmail.com | +6281365338011 | <https://github.com/fauzanhaziz> | <https://linkedin.com/in/fauzan-haziz/>

PROFILE

I'm a Software Engineering Technology student with a strong interest in Web Development, Artificial Intelligence, and Data Science. Experienced in building web-based systems and developing Python-based projects, including phishing detection systems. Skilled in backend development, database management, and data analysis, with a focus on building scalable web applications and intelligent systems to solve real-world problems.

EDUCATION

Politeknik Negeri Padang

Bachelor of Applied Software Engineering Technology

Cumulative GPA: 3.41/4.0

Padang, Sumatera Barat

2023 - Present

WORK EXPERIENCE

Phishing Detection System (Ongoing)

February 2026 - Present

Machine Learning Developer

- Developing an intelligent phishing detection system to identify malicious websites using Python.
- Implementing machine learning models (LightGBM, CatBoost) to improve phishing detection accuracy.
- Performing web scraping and data preprocessing to build a structured dataset.
- Integrating the trained model into a web application using Django and PostgreSQL.
- Designing an end-to-end pipeline from data collection to deployment.

Web-Based Car Rental System

August 2025 - January 2026

Software Developer

- Developed a web-based car rental system using Django and PostgreSQL.
- Designed relational database schema to manage booking transactions and user data.
- Built RESTful APIs to handle rental operations and system interactions.
- Improved efficiency of booking and data management processes.

School Management System (TK Level)

February 2025 - June 2025

Backend Developer (Team Project)

- Collaborated in a team to develop a school management system for administrative processes.
- Developed backend features using Laravel for managing student and teacher data.
- Implemented CRUD operations and contributed to database design.
- Enhanced data organization for improved accessibility and system efficiency.

SKILL

- Technical Skills** : Programming: Python, PHP | Frameworks: Django, Laravel | Database: PostgreSQL, MySQL | ML: LightGBM, CatBoost | Others: REST API, Web Scraping, Git.
- Soft Skills** : Problem Solving, Critical Thinking, Attention to Detail, Collaboration.
- Languages** : English (Fluent), Indonesian (Native).
